SUMMARY

Computer Programming & Analysis student at Fanshawe College (GPA 4.1, Dean's Honours every semester) graduating December 2026. Built a hands-on Active Directory home lab (Windows Server 2022, Group Policy, user and account management) alongside test-driven full-stack projects in C#/.NET and React. Seeking an entry-level IT support, QA, or software development role. Fluent in English with working French proficiency, and experienced in customer service and team coordination.

LANGUAGES

English: fluent. **French:** TEF Canada (Aug 2026) — Written Expression C1, Reading B2, Listening B2, Oral Expression B2

EDUCATION

Computer Programming and Analysis (Advanced Diploma) — Fanshawe College Sept 2023 – Dec 2026 (Expected)

- Cumulative GPA: 4.1; Dean's Honours List in all five completed semesters
- Coursework: Client-Server Development (C#, HTML, CSS, JavaScript), Data Structures & Algorithms (C++), Object-Oriented Programming (Java, C++), Software Design Patterns
- Recommended by the program coordinator to a software company for a summer internship based on academic and project performance

PROJECTS

Active Directory Home Lab VirtualBox, Windows Server 2022, Windows 11, Group Policy

Repository: github.com/thushar003/active-directory-home-lab

- Built a virtual enterprise network: Windows Server 2022 domain controller with DNS (domain corp.lab, static IP on a NAT network) and a Windows 11 Pro client joined to the domain.
- Structured the directory with OUs (Sales, IT, HR, Workstations, Disabled Users), user accounts, and an IT-Helpdesk security group; practiced help-desk tasks including password resets, account unlocks, and disabling accounts.
- Configured and verified a Group Policy (restrict Control Panel) with gpresult, and set an account lockout policy (3 attempts, 30 minutes); reproduced a lockout and resolved it.
- Troubleshot VM install and boot issues (including a black-screen Windows 11 VM) and documented the build with screenshots on GitHub.

Support Ticket System (Beacon) — Active Development C#, ASP.NET Core, React, TypeScript, SQL

- Building a decoupled help-desk application with a C# ASP.NET Core API and a React/TypeScript client.
- Designing a layered architecture (Controllers, Services, Repositories/DAOs) for ticket assignment, status tracking, and SLA priority tiers.
- Writing xUnit tests in Visual Studio to validate database transactions, input parameters, and exception handling.

iTinder — Agile Team Project (Dating Application) React, Node.js, Express, Supabase (PostgreSQL)

- Front-end engineer on a 4-person Agile team: sprint cycles, feature branches, peer code reviews, and occasional pull request merges.
- Built responsive React interfaces with state management; contributed to schema design discussions and Supabase authentication integration.

Full-Stack CRUD Web Application — College Case Study C#, HTML, CSS, JavaScript, React

- Built a multi-layered C# and React application using Repository and DAO patterns, with 11 xUnit tests covering the CRUD functionality.
- Wrote Cypress end-to-end tests for a closely related college project, covering full user flows in the browser.

WeatherStats — Android App Kotlin, Jetpack Compose, REST API

- Native Android app that retrieves and displays weather data from the Weatherstack REST API using asynchronous calls.

WORK EXPERIENCE

Industrial Cleaner — Robinson Solutions (Toyota Plant, Woodstock, ON) Jun 2025 – Aug 2026

- Stepped in as Acting Team Lead, coordinating task allocation and communicating with the crew.
- Worked alongside production teams under strict safety and confined-space compliance standards.

Team Member — Chick-fil-A (London, ON) Dec 2023 – May 2025

- Resolved customer issues and service bottlenecks on the spot during high-volume periods.
- Multitasked across stations during peak rushes to keep service fast.

TECHNICAL SKILLS

IT & Systems: Active Directory, Windows Server 2022, Windows 11, Group Policy (GPO), DNS, user/group/OU management, account lockout and password policies, VirtualBox
Languages: C#, Java, C++, JavaScript, TypeScript, Kotlin, SQL, HTML, CSS
Frameworks & Libraries: ASP.NET Core, React, Node.js, Express.js, Jetpack Compose
Databases: SQL Server, MySQL, PostgreSQL, Supabase
Testing & Tools: xUnit, Cypress (end-to-end), Git/GitHub (pull requests, code review), Visual Studio, VS Code, Android Studio
In progress: Selenium test automation; ISTQB Certified Tester Foundation Level; CompTIA A+
